

ABC Logistics pays

**£585**

per month

for cardboard  
collection charges

ABC  
LOGISTICS

The best-fit baler for  
ABC Logistics' needs costs:

**£201.67 per month to hire**  
**£7,500 to purchase outright**

By baling the cardboard, and thus avoiding the current  
'waste' collection fees, ABC Logistics would

save **£585** per month  
(or **£7020** per annum)

Less the hire cost of the baler (£201.67), this equates to  
**a net saving of £383.33 per month.**

If ABC Logistics chose to purchase the baler outright,  
**a return on investment would be  
achieved in less than 13 months!**

£7500 purchase price / (divided by) £585 monthly saving  
= 12.8 month payback period.

**This is also before the rebate value of  
cardboard has been taken into account!**

If a mill size bale of cardboard can return

**£45** per tonne,

and the company produces 2 tonnes per month,

the **£90** additional revenue

stream would mean an

**ROI is achievable in approximately 11 months!**
