

D&B Supplies Ltd

Background

D&B Supplies Ltd is a UK CD and DVD recycler. Based in Darlington, the media-orientated firm was founded in 2015 and regularly produces excess cardboard and plastic waste due to its ongoing operations.

The Solution

The RWM 500 waste baler— which has a press force of 50 tonnes and can easily handle large and bulky amounts of cardboard, paper, plastics and film — was recommended to Martin. It is especially popular with businesses that seek to produce large bales to maximise their efficiencies and load capacities, and is robust, secure and durable.

The Challenge

Martin Murphy, managing director at D&B Supplies Limited, said: “We have rented an RWM 75 baler from Riverside Waste Machinery for over a year, but required a new larger machine to deal with the pure volume of excess plastic waste.”

“We were happy with the previous interactions with Jonathan Oldfield and the Riverside team — a company local to us that provides a fantastic service — we got in touch once again to look at the options for purchasing a larger baler.”

The Results

D&B Supplies purchased the RWM 500 machine, while also keeping the RWM 75 waste baler. The materials which are now being baled at the site include two tonnes of plastic and 40 tonnes of cardboard, each month (an average of 80 bales, which is then sold onto a waste collection company).

Martin adds: “We’re no strangers to baling, but would highly recommend the service provided by Riverside Waste Machinery — both in terms of rental and purchase options. The advice is fantastic, the products are robust and it’s great to support local businesses too!”
